

Digital Transistors (Built-in Resistors)

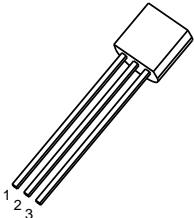

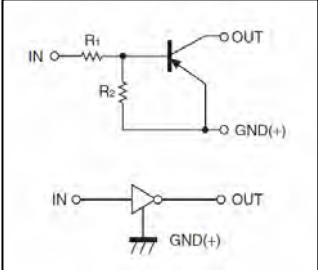

DTA113ZVA

DIGITAL TRANSISTOR (PNP)

FEATURE

- Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit)
- The bias resistors consist of thin-film resistors with complete isolation to allow positive biasing of the input. They also have the advantage of almost completely eliminating parasitic effects
- Only the on/off conditions need to be set for operation, making device design easy
